## *THE Roll-A-Ramp DIFFERENCES*

- Feature:** It looks dramatically different with a black anodized surface.  
**Benefit:** Anodizing prevents corrosion of the aluminum surface which makes it cleaner to handle.
- Feature:** Yellow Caution covers.  
**Benefit:** The only ramp that offers a cover over a possible pinch point.
- Feature:** Reflective Tape.  
**Benefit:** Provides a guide to assist the chair user as they use the ramp.
- Feature:** Each of the 6" ramp sections is easily removed.  
**Benefit:** Dealers can quickly adjust their inventory to meet customer's needs by adding links.  
**Benefit:** Roll-A-Ramp adjusts to the client rather than make the client try to fit the ramp.  
**Benefit:** Damaged ramps may be easily repaired with the purchase of only needed sections.
- Feature:** Safety rails are an integral part of each section.  
**Benefit:** They prevent wheels from easily moving off the ramp.
- Feature:** Built in traction ridges and open construction.  
**Benefit:** All weather traction surface that will not fill with debris or wear out.
- Feature:** Two special bolts connect each section.  
**Benefit:** Sections may be easily added or subtracted in order to customize the length for any need.  
**Benefit:** The roll up feature can be easily converted to a folding ramp by tightening the bolts.  
**Benefit:** Any ramp may be divided with a Positive lock pin in order to reduce ramp's weight.
- Feature:** Low weight extremely high strength aircraft aluminum construction.  
**Benefit:** No other 8 foot ramp can carry 1000 pounds and only weight 24 pounds per section.
- Feature:** Cambered sections create an arch in the top of the ramp.  
**Benefit:** This provides for a smoother on-off at the top of the ramp and easier entry at the bottom.
- Feature:** 10 year Warranty  
**Benefit:** Roll-A-Ramp is a product built to last. Compare to the lifetime cost of conventional ramps.
